

ECOS 90

Recycling for	Capacity
All sorting	90 L

Description

The ECOS system (Easy Collect System) is a range of efficient, space-saving collectors that are top of the line when it comes to use, design and manufacturing quality.

The universal 90-litre model was specially designed to facilitate the emptying and collection of heavy, hard-to-handle bags.

It's lightweight and has an exclusive front translation emptying system to save both time and energy. These bins have been chosen by companies seeking innovative solutions that help them improve PRODUCTIVITY.

Collector sold alone or as optional interior bin for the AGORA 90C.
